

FOLIO

Board of Governors

Friday, 6 May, was an eventful day for Board members. There was an 8:30 a.m. meeting, complete with weighty agenda; a luncheon at University House, followed by the induction ceremony for the Sports Wall of Fame; and the official opening of the University Pavilion at 2 p.m. The meeting produced the following news.

Quota Increases

Quota increases in a number of departments will take effect in September 1983. Agricultural Engineering admitted thirty-two students this year although the quota was set at twenty. If the great demand for places continues the department may seriously consider an even higher increase.

The acting program in the Department of Drama was revised last year, becoming a three-year rather than a four-year program. Starting in September 1982, students were required to complete the first year of an approved BA program for admission. Consequently, no applicants were admitted and a new class of sixteen students will be admitted to the program in September 1983.

Three departments in the Faculty of Engineering will experience quota increases. First-year engineering has added twenty students, an increase that reflects the phasing-in of students for the co-operative education program. Chemical Engineering's proposal for an additional twelve students is now being considered by Alberta Advanced Education. The addition of fifteen students in Civil

Engineering is also a reflection of the phasing-in of students from the co-operative education program.

The basic four-year program in the Faculty of Nursing will accommodate twenty more students; the Department of Speech Pathology and Audiology, Faculty of Rehabilitation Medicine, will admit an additional eight students.

New Dean, Graduate Studies and Research

Fu-Shiang Chia has been appointed Dean of the Faculty of Graduate Studies and Research. Dr. Chia will take up the position on 1 January 1984, following study leave. From that time, S.B. Woods and Walter Gainer will serve as Associate Deans.

Dr. Chia received his baccalaureate from Taiwan Normal University and his master's and doctoral degrees from the University of Washington. Following five years at the Zoology and Friday Harbor Laboratories at the University of Washington, he joined the biology department at Sacramento State University, California. Dr. Chia later moved to the Zoology and Dove Marine Laboratory at England's University of Newcastle upon Tyne. He was appointed to our University's Department of Zoology in 1969 and became its Chairman in 1978.

Dr. Chia's research interests concern the development and reproductive biology of marine invertebrates, particularly topics related to brooding behavior and settlement and metamorphosis of marine larvae and

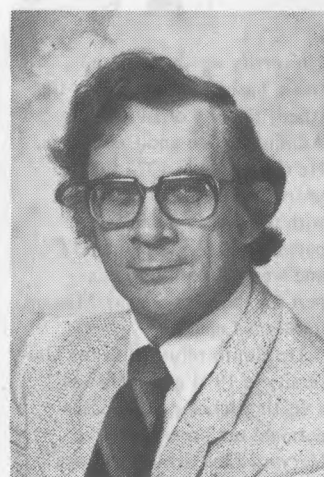

reproductive strategies. He has lectured throughout the world and is a member of a number of scientific societies including the American Association for the Advancement of Science, the Canadian and American Society of Zoologists, and the International Society of Invertebrate Reproduction.

Peter Miller Appointed Dean of Students

Peter Miller has been appointed Dean of Students for a five-year term beginning 1 July 1983.

A graduate of the Universities of Cambridge, London, and Leeds, Dr. Miller also studied at The University of Alberta and was conferred BEd, MEd, and PhD degrees here. He specialized in the history of education.

Dr. Miller was a secondary school teacher and also a cooperating teacher for the Faculty of Education prior to becoming a special lecturer at Alberta. He was appointed Chairman of the Department of Edu-

cational Foundations in 1976, a position he has held ever since.

Dr. Miller has taught a variety of courses including issues in contemporary education, philosophy of education, history of educational thought, and concepts of childhood in history.

He belongs to the Canadian Society for the Study of Education, the History of Education Society, and the Canadian Association of Foundations of Education.

Dean of Business Re-appointed

Roger Smith has been re-appointed Dean of the Faculty of Business for another five-year term beginning 1 July 1983.

Dr. Smith studied at the Colleges of Pomona, Swarthmore, and Oberlin, and at Harvard University, and received his master's and doctoral degrees from the University of California, Berkeley.

His first appointment to our

University was in 1969; he was a business economist in the (then) Faculty of Business Administration and Commerce. He took leave in 1972 for two years to serve as an economist with the Fiscal Affairs Department in Washington, D.C., and was a fiscal affairs expert for the World Bank Mission to Sierra Leone.

Dr. Smith returned to the University in 1974 and later was a visiting scholar in the international tax program at the Harvard Law School. He was appointed Dean of the Faculty in 1978.

Public finance, specifically local government; taxation theory, property taxation, and tax expenditures are among his

teaching and research interests.

Dr. Smith's professional affiliations include membership in the Canadian and American Economic Associations, the National Tax Association, and the Financial Executives Institute. He is President of the Management Education Coordinating Council of Alberta.

Rodney Schneck, Professor of Organizational Analysis, will serve as Acting Dean for the period 1 July 1983 to 30 June 1984.

Department Chairmen

The Board's Educational Affairs Committee announced the appointment and re-appointment of six department chairmen.

Gerald Higgins will lead the Department of Family Medicine. The dates of his term of office are 1 October 1982 to 30 June 1987. Dr. Higgins joined this University's faculty in 1973 and has been Acting Chairman since last October.

Bob James will continue as Chairman of the Department of Electrical Engineering. His three-year term begins on 1 July 1983. He received his bachelor's, master's, and doctoral degrees from the University of British Columbia and was appointed to our University in 1965. Dr. James has been Chairman since 1974.

Dianne Kieren will head the Department of Family Studies, effective 1 April 1983 until 30 June 1986. Dr. Kieren joined the University in 1970 and was Chairman of the (then) Division of Family Studies from 1970 to 1975, and from 1977 to 1981.

W. David Sharp will begin his chairmanship of the Department of Philosophy on 1 July 1983. Dr. Sharp's will serve a three-year term. He obtained his baccalaureate from the University of British Columbia; his doctorate was awarded by Princeton University.

Robert Silverman will carry on as Chairman of the Department of Sociology. His two-year term commences on 1 July 1983. Dr. Silverman

came to the University in 1977. He has been Chairman of the department since 1980.

Ulrich Trumpener has been appointed Chairman of the Department of History for a three-year term effective 1 July 1983. Dr. Trumpener received his BA from Oregon State University; his MA and PhD were taken at the University of California. He has been on staff here since 1966.

Parking Permit Fees

The following parking permit fees were approved by the Board.

- *Reserved stall*: with plug-in—\$300 p.a., \$25 p.m.; without plug-in—\$264 p.a., \$22 p.m.; additional fee for 24-hour reserved stall—\$50 p.a., \$4.50 p.m.
- *Reserved zone*: with plug-in—\$264 p.a., \$22 p.m.; without plug-in—\$228 p.a., \$19 p.m.
- *Peripheral zone (Jubilee)*: \$120 p.a., \$10 p.m.
- *Alternate car*: \$8 p.a.
- *Spring and Summer Sessions*: \$19 per session.
- *Casual*: (a) weekday arriving before 10:30 a.m.—\$2.50 rate on entry; weekday arriving after 10:30 a.m.—\$2 rate on entry. (b) weekend, including holidays (in attended areas only)—\$2 rate on entry.
- *Parking meters*: \$0.80 per hour.

The Board was told that Parking Services continues to operate on a "break-even" basis and that rate increases this year result from increased costs of operation. These increases result from normal inflationary increases and the financing costs of Car Park III, west of the Education Gymnasium.

Fees for Remediation Programs

The Governors approved the levying of a \$60 per student fee for both the mathematics remediation and English remediation programs, effective with the advent of the 1983-84 winter session.

In 1982-83, the Department of Mathematics instituted a mathematics remediation program. It is a voluntary program and is optional to all students, registered in an introductory calculus course, who

have been identified as lacking basic skills in high school mathematics. The first-year costs of this program were funded from University resources. However, the President's Executive Committee agreed that, together with all other remediation programs, it should be funded on a cost recovery basis. The \$60 per student charge is estimated to achieve the cost recovery objective.

The English remediation program, which will be mandatory for all students who fail the English Language Competency Test, will also institute this cost recovery measure. However, should a student again fail the test following remedial work, another series of remedial lessons would not be compulsory, and other corrective alternatives would be offered at no charge.

Link With King's College Established

The Governors approved an affiliation agreement between the University and the King's College of Edmonton. The agreement will stand for an initial period of three years at which time it will be reviewed. By 30 June, the parties will have developed a list of courses, approved for transfer.

Part of the agreement calls for the libraries at both institutions to cooperate closely and for a copy of the University's Com Cat (a microfiche catalogue of library holdings dating from 1974) to be made available. The King's College is also encouraged to place emphasis on developing its own library.

The College is a Christian liberal arts post-secondary institution. It is not affiliated with a specific denomination, but is maintained by The King's College Corporation whose 6,000 members are associated with various denominations.

Now in its third year of operation, the College offers courses in arts, science, education, and theology. Its student population comes from Alberta, five other provinces, and two foreign countries. The College employs a full- and part-time staff of forty-one people. □

Goodbye, Purchasing Hello, Materials Management

The Materials Management Department has moved from the "downtown core" to the "suburbs" without missing a beat. No need to send the welcome wagon 'round though—the "family" of 123 people is all business.

"I'm amazed that we moved in the stores inventory and distribution operation as fast as we did," Roy Bennett, Director of Materials Management, told *Folio* recently. The department, previously called the Purchasing Department, moved from the General Services Building to new quarters just to the southwest of the Jubilee Auditorium. The move began on Easter weekend and, while a number of offices on the third floor are still being appointed, everyone and everything is present and accounted for.

A tour of the facility quickly shows that the warehouse and mezzanine were designed to provide the most effective materials flow possible. The building design complements the re-structured operation consisting of Purchasing, Dispatch Distribution (Shipping and Receiving), Scheduled Distribution (Mail and Light Parcel Delivery), and Central Stores.

Central Stores makes use of the largest part of the 3,822 square metres on the main floor. There is a nine metre clear ceiling except for those areas directly under the mezzanine. The mail room on the mezzanine is serviced by a powered, reversible conveyor. The Central Stores office is on the third floor as are purchasing offices, a conference room, various administrative offices, and a lunchroom. As there is no green, open space in the immediate vicinity, part of the rooftop deck is available for lunch and coffee breaks.

Kom-Lynn of Vancouver acted as consultants; the architect was

Maltby Prins. Construction was on a design/build basis; the contractor was Stuart Olson Construction. The University's Interior Design Branch designed the 1,300 square metres of office space; Cathe Lane was the interior designer.

Why the name change? The re-structured operation hinges on a materials management concept, one which calls for one system to handle all aspects of the University's requirements for goods and materials from "the first perception of need until the ultimate disposal of any surplus, scrap, or worn out material and/or equipment."

According to Mr. Bennett, the change will eliminate confusion resulting from the positions Director of Purchasing, Purchasing Manager, Distribution Manager, and the organizational relationships of these positions and functions. The new name is also more in line with contemporary usage, he feels.

The new direction can be traced to early 1982. The Purchasing Manager, Martin Craige, was relatively new, having joined the University in August 1980 from the private sector; the Distribution Manager, Barry Lofto, succeeded Lyall Foulston in 1982; the structure of the department had not been changed substantially for several years; and, last but by no means least, the economic forecast called for the provision of essential services utilizing fewer resources. The resulting mission statement, which all members of the department had input into, to at least some degree, emphasizes that "Materials Management will provide optimum service to the University, keeping in mind the necessity for control and the need to optimize the use of the University's resources."

The building's main entrance

is on the south side. The west side has ten doors of which three are dedicated to Shipping and another three to Receiving. With regard to the mail, each delivery truck is equipped with two sets of mobile racks so that one set is being loaded while the vehicle is making a run. A small sorting crew has the next load ready so that incoming internal mail is sorted and added to the load. The entire load is clipped into the truck during the driver's coffee break.

Most campus mail is delivered within three hours and the system is monitored regularly to ensure performance. Oh, yes. As mail personnel are on their feet a lot, the finished floor will be a tad springy to guard against leg soreness.

The Materials Management Building consolidates 2,230 square metres of space in a west Edmonton warehouse and all units that were in General Services (Computing Services has inherited the space). The warehouse bays hold office furniture, lumber used in the carpentry shop, paper (the University buys it directly from the mill and it comes in boxcars, plural), and other bulky materials. A sale is being organized for mid-summer at the west end facility as part of the "moveout" and any items not required will be sold rather than moved to campus. Those items not disposed of at the sale will be moved on campus. (Last year, the University real-

ized some \$2 million from disposable assets.) More information on the sale will appear in *Folio* in the near future.

All telephones will be installed in the new building at the end of May; the current numbers will not be changed. Mail intended for Materials Management personnel should be directed to the Materials Management Building. □

Alma Alice Quick, 1909 - 1983

Alma Alice Quick passed away on 2 May 1983. Mrs. Quick, mother of the Assistant Manager of the University Bookstore, worked on campus from 1956 until 1973. Well known to staff and students, she was Postmistress at The University of Alberta from October 1966 to April 1973. □

Summer Publishing Schedule

During June, July and August, *Folio* will be published bi-weekly. The bulletin will appear on 9 and 23 June, 7 and 21 July, and 4 and 18 August.

Current deadlines will remain in effect.

Folio will return to a weekly publishing schedule in September. □

Concerns Aired as Advisory Committee Meets

Continuing to investigate what people really think about higher level education in this Province, the Minister's Advisory Committee on University Affairs held two public meetings in Edmonton last week. The first was held at The University of Alberta on 10 May; the second at Athabasca University on 11 May. *Folio* attended the first meeting.

Three public briefs were received by the Minister of Advanced Education's fifteen-member committee in the morning of 10 May. The first of the three was presented by Robert Greenhill and Andrew Watts, respectively President and Vice-President (External) of our Students' Union. Messrs. Greenhill and Watts obviously welcomed the opportunity of airing SU concerns to a group that has direct access to the Minister. Mr. Greenhill noted that input to the Advisory Committee last year led directly to more studies in the "participation" rate as it relates to higher education, an observation appreciated by the committee. Mr. Watts then took up the torch, the seemingly eternal flame of concerns about student aid. Cogently reiterating arguments about the age of majority and the financial dependence of students upon parents, the need for enhanced resources for the Student Finance Board and the vagaries of the loan remission program, Mr. Watts evidently impressed the committee--as did Mr. Greenhill--with his strong concern for the quality of educational opportunities in Alberta.

The next brief, presented by the President and Vice-President (External) of the University of Lethbridge Students' Union, was equally succinct and dealt with issues particularly relevant to their institution. Having reduced the scope of their proposed Student Activity Centre, students at Lethbridge would dearly like

some financial aid, especially as they have shown great initiative in amassing more than \$320,000 to be directed toward the centre's construction. The Lethbridge representatives also noted that, since 1979, enrolment at their university had increased by more than eighty percent and that general first-year quotas are now being discussed.

The third brief presented to the committee was made by George Walker and Keith Philip, Manager and Research Officer for our University's Non-Academic Staff Association. This was the first time that the Association had ever presented a brief to the Minister's Advisory Committee. The well-argued presentation called for fundamental changes in negotiating procedures currently prescribed by the *Public Service Employee Relations Act* and was made in light of the fact that a *Labour Statutes Amendment Act* will be considered in the current sitting of the Legislative Assembly. Essentially, Mr. Walker suggested that the current procedures alienate employee from employer. He argued that University staff are different from workers in industry. People at the University, Mr. Walker suggested, are primarily members of a University community and have the welfare of that community at heart. Over the last few years, Mr. Walker said, there has been an unfortunate polarization of interests with management trying to retain its rights and the Association attempting to maximize members' incomes. The Association would like to reverse that trend, avoid the tarnish of being considered a "union" eager for confrontation, and have negotiations with the Board of Governors regulated by *The Universities Act*.

The afternoon session was given over to two presentations. The first, by Mehdi Shal-

lwani, essentially drew a picture of one man's frustrations.

Mr. Shallwani, a university graduate with a master's degree, wondered why more courses could not be offered in such areas as business, engineering, and computing science. At present, he said, part-time students often have to wait one or even two semesters between taking one course and its successor.

Mr. Shallwani's second point had to do with the required residency for students embarking on doctoral studies. The minimum requirement for a student with a master's degree is two years full-time study at the University. The regulation, in Mr. Shallwani's opinion, places doctoral studies out of reach for many people with full-time employment.

Mr. Shallwani gave voice to other frustrations as well. He questioned the calibre of teaching at The University of Alberta and wondered whether or not the assessment of teaching ability had any place in the appointment process. He also complained that students run afoul of bureaucracy and red tape. He said that too often students are prevented from gaining advice from senior members of staff by people at the "lower clerical level." Mr. Shallwani ended his presentation with the suggestion that when a person is considered for a faculty position, not only should scholarly ability and teaching excellence be criteria for selection but attention should also be paid to the candidate's success as a human being.

The final presentation to the Minister's Advisory Committee on University Affairs on 10 May was a brief on University library facilities presented by Allan McDonald (University of Calgary), Peter Freeman (University of Alberta), and Paul Wiens (University of Lethbridge). The three library chiefs made a joint report to the committee in which

they outlined the problems currently facing institutional libraries in the Province, for example inflation that exceeds by far the so-called "cost of living index," increased and more intense use by students, the need to reduce duplication of effort, and the enormous expansion in the amount of information available. They noted the conflict that has arisen between collection and study space. They noted also that limited resources, notwithstanding the Province's generous assistance through the Alberta Heritage Savings Trust Fund for library development, has led to a conflict between the purchase of books or monographs and learned journals.

After discussing for some time the developing electronic networks for the transfer of information, the presenters were asked by a member of the public what resources were being made available to "bright children." In essence, are university libraries considered to be a community resource? The presenters agreed that university libraries are very much a community resource but that, in keeping with their major function, their first priority is to serve students and staff in the universities.

So ended the 10 May meeting of the Minister's Advisory Committee on University Affairs. No doubt there was more of the same, the next day at Athabasca University. □

The President's Walk

Science Teaching Award Goes to Stanley Rule

On 16 May the Faculty of Science Award for Excellent Teaching was awarded to Stanley J. Rule, Professor of Psychology. Dr. Rule was selected as the outstanding teacher in the Faculty for the academic year 1982-83. His excellent teaching abilities have been long recognized by both students and colleagues. To quote some of his former students, he has the ability "to communicate difficult concepts, and state-of-the-art information simply and clearly", with an "enthusiasm which inspires the will to learn" and done in "such a skillful manner that

others do not realize that they are being taught."

Dr. Rule's teaching has spanned a range of courses, including those in statistical methods for psychological research, perception, experimental design, principles of psychology, and advanced scaling theory.

Dr. Rule is a graduate of the University of Redlands (BA 1958), and received both the MSc (1961) and PhD (1962) degrees from the University of Washington. He was appointed to The University of Alberta in 1962. □

Devonian Botanic Garden Open for Season

The University of Alberta Devonian Botanic Garden is open to the public, free of charge from May to September. The hours are 10 a.m. to 4 p.m. weekdays and noon to 6 p.m. weekends and public holidays.

The Garden maintains a labelled collection of plants hardy in central Alberta and includes a herb garden and alpine garden, an extensive collection of trees and shrubs, a collection of native plants and a

garden of plants used by the native peoples.

Group tours are available by arrangement for children and adults during working hours. Please telephone 987-3054 for bookings.

Day and evening classes on gardening topics, crafts and nature study are offered. Call 987-3054 for a brochure.

The Garden welcomes visitors. It is located on Highway 60, some 4.8 kilometres north of Devon. □

Isabelle Taylor, 1938 - 1983

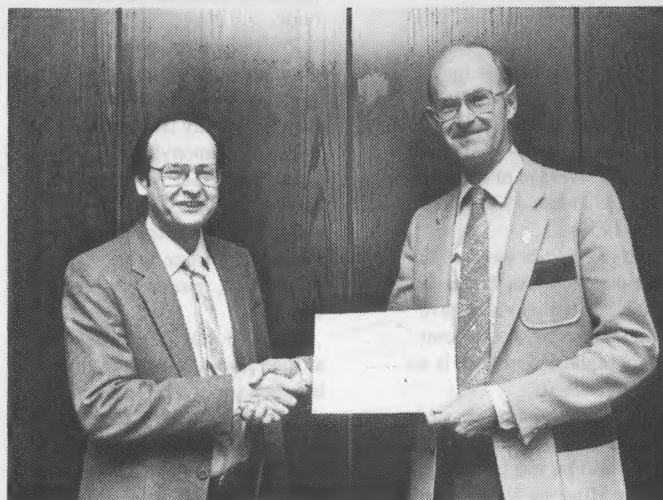

Isabelle Taylor, Secretary to Amy Zelmer, Associate Vice-President (Academic), died suddenly on 7 May 1983. She is survived by her husband Reg, a son Brent, and a daughter Jo Anne, and by her parents, a brother, and a sister.

Subsequent to many years secretarial work in industry and government, Mrs. Taylor joined the staff of the University in 1977 as Office Services Supervisor in the Office of the Comptroller. In 1978, she was transferred to the Faculty of

Nursing where she served as Secretary to the Dean. In 1980, she became Secretary to the Associate Vice-President (Academic), the position which she held at the time of her death.

Mrs. Taylor was a very warm and understanding person. Her ability to carry out her job effectively while making staff and students comfortable will be sorely missed by her many friends and colleagues.

Memorials to honor Mrs. Taylor may be sent to the Kidney Foundation of Canada. □

Dr. Rule (left) receives the teaching award from Dean McDonald.

Why are Canadians Dying Out? or Empty Cradles Prompt National Study

Why Canadian women are having fewer babies will be the focus of a \$730,000 research study by University Professor Karol J. Krotki. Working with him on the study will be co-investigators T.R. Balakrishnan, University of Western Ontario Population Studies Centre, and Mme. Evelyne Lapierre-Adamcyk, University of Montreal, Department of Demography.

Fewer children are being born today, and that factor will have a profound impact on our aging society, says Professor Krotki, an associate in the Population Research Laboratory, Department of Sociology.

It will affect housing, education, bilingualism, immigration, and employment in the future and may even result in disaster for the pension plans of today's working people, he adds.

The three-year Canadian Fertility Study, funded by the Social Sciences and Humanities Research Council of Canada, will involve about 5,000 eighteen to forty-nine year-old women selected randomly by computer generation of telephone numbers.

The women will be asked to participate in a forty-five minute telephone interview covering their attitudes toward marriage, desire for children, reproductive history, method of contraception, education, marital and socio-economic status; included will be questions referring to the still unknown interrelations between economics and fertility.

"The main purpose of the study of fertility and family in Canada is to assess the attitudes, aspirations and motivations for women with regard to family size and timing of births," Professor Krotki says.

"To date, in Canada, there have been only limited in-depth investigations of reproductive behavior and with limited territorial coverage," the researcher says. The 1974 study of Alberta drew the attention of the next congress of the International Statistical Institute because of its innovative methodology.

Interviewing will begin in January 1984 and should be completed by March 1984. A preliminary report is expected by October of that year

and a final report will be published as a book by July 1986.

For the last decade married Canadian women have been bearing a statistical average of 1.6 children each—well down from the average of four children recorded in late 1940s and early 1950s.

Large families have all but disappeared, notes Professor Krotki. "Fertility rates have been decreasing to the point where replacement level is no longer reached."

He expects to find that education and labour force participation will be two primary factors affecting fertility, with the influence of income, current and prospective, more difficult to determine.

The traditional pattern of women leaving the work force after marriage to have children and getting a job when the children grow up is changing.

"Women who work always have fewer children—about half as many—as women who never work."

It also appears that the more education a woman has,

the fewer children she eventually will bear.

Professor Krotki says that women who marry at a young age have more children, but the trend today is to delay marriage. Matrimony itself is no longer a goal for many young people.

For those who still believe in marriage, divorce is breaking up families, resulting in fewer children.

"Divorce rates are stabilizing at high levels, indicating that between twenty to thirty percent of couples married since 1965 may get a divorce, Professor Krotki says.

Methods of contraception have changed dramatically in the last two decades, as well. Abortions are more common and people who do not want any, or any more, children are undergoing tubal ligation or vasectomy at an increasingly younger age, he adds. Women typically carry the burden of these methods to a greater extent than men. South of the Canadian border it has been shown that even young couples, and even divorcing couples, risk foregoing

the possibility of having children.

Results of the research will be of interest to social scientists, educators and government.

Dr. Krotki speculates that government could enact new immigration policies to counter the impact of declining fertility or even offer incentives to have children.

Changes in fertility rates have an important impact on the planning of education, health and other social services, he says.

Pensions, social insurance, and medical care for the elderly are largely provided for by the working population, making the ratio of this age group to those in older ages crucial.

While the "baby bust" generation being born today will have advantages over the "baby boom" generation of the late 1940s and mid-1950s—such as less competition for jobs—fewer children will also result in less demand for manufactured goods and services.

The housing market is also affected by fertility. Not only has the number of households increased faster than the overall population, but the type of housing desired is also undergoing substantial change. An increased proportion of the population will be living in apartments and townhouses in the future if current trends continue, Dr. Krotki predicts.

Fertility more than anything else will determine the future ethnic and cultural composition of Canada, according to the demographer.

Professor Krotki's research may not convince couples to have more children but, he says, "it is essential to know the factors that have influenced such a drastic fertility decline, and, more importantly, to be able to say whether it will continue in the future." *□

**The above article was contributed by Professor Krotki. Much of the phraseology comes from an interview that a co-investigator gave to the University of Western Ontario's Western News and The London Free Press.*

Faculty Publications on Third World Topics Sought for Universiade Display

For the last two weeks of June and the first two weeks of July, during the World University Games, the display cases in the Rutherford Library Galleria have been reserved for a display of major publications on Third World topics. The publications have been authored or edited by past and present members of the University faculty. The display, intended for the benefit of Universiade visitors, serves as a demonstration of the University's academic interest in the area of developing nations. It is being organized by the Area Studies Committee (Africa/South Asia) (formerly "GOALAS"—Group

on Oriental and African Languages, Literatures and Area Studies), an Advisory Committee to the Dean of Arts.

The Committee hopes to have contributions from as many disciplines as possible in the University, and would also appreciate the opportunity to consider photographs and other objects for the display.

If you have suggestions or contributions, contact the Area Studies Committee Chairman, Stephen Arnold, Department of Comparative Literature, 432-5535, or the Secretary, Suseela Subbarao, Department of Entomology, 432-4652. □

page six, Folio, 19 May 1983

Senate Member Donates Rutherford Book

A book from the personal library of Alberta's first Premier has been donated to The University of Alberta. Signed by A.C. Rutherford, the gold embossed book is a copy of the first Statutes of the Province of Alberta. Tom Walsh, Calgary lawyer and member of the University of Alberta Senate, turned the book over to the University nearly thirty years after it found its way from Rutherford's library to his.

After Premier Rutherford's death, his house, situated on the northeast edge of campus, was given to the Delta Upsilon Fraternity. The terms of the Premier's will indicated that his personal library, or any part deemed of value, should go to the University of Alberta Library. When Marjorie Sherlock, then University Librarian,

took stock of the DU House shelves, she overlooked his personal copy of the statutes. To Mr. Walsh, an aspiring young law student living in the DU House, the book was a find. "It is an absolute gem," he states. "To lawyers and anyone else interested in the law and the history of the Province, the book is quite a prize."

Then why relinquish it? Mr. Walsh became a member of the University community last year. Presenting the book to the library is his way of paying tribute to the University during its 75th Anniversary year. "I've been custodian, if you will, of the book for nearly thirty years. This seems a good time to present the book to the University, a good way of recognizing the 75th Anniversary." □

Correction

With reference to Medic Canada '83 (*Folio*, 5 May 1983), the conference has been planned from its inception by the Canadian Association of Manufacturers of Medical Devices (CAMMD) with the assistance of Robert First Inc., White Plains, New York. The Division of Continuing Medical Education, University of Alberta, has taken a minor advisory role, and has been of assistance in an administrative capacity in Edmonton. □

people

The ninth recipient of the Job Visiting Professorship extended by the Department of Chemistry at Memorial University of Newfoundland, is *William A. Ayer* (Chemistry). Dr. Ayer will give five lectures during the period 13 to 20 May.

Patricia G. Kushnir (Engineering Placement Office) and *J.S. Kennedy* (Engineering) presented a paper entitled "Academics in Co-op Administration" to the Canadian Association for Co-operative Education. The association's conference, this year combined with that of the Co-Operative Education Association of America, was held in Toronto, 17 to 22 April. Co-authors of the paper were *P.F. Adams* (Engineering) and *D.G. Bellow* (Mechanical Engineering).

Raymond Lemieux (University Professor) will initiate the Tishler Lectures at Harvard University on 24 May.

Eva Murray (Housing and Food Services) and *Alex Nagorski* (OAS) presented a paper entitled "An Automated

Housing System: Using JAD, a Distributed Processor, and a Package" at the 28th annual College and University Machine Records Conference (CUM-REC) held at Baylor University, Waco, Texas, 1 to 4 May.

Louis A. Pagliaro (Pharmacy) and *Ann M. Pagliaro* (Nursing) have co-edited a comprehensive text dealing with drug therapy in the elderly entitled *Pharmacologic Aspects of Aging*. In addition to the editors, contributions to the text were made by fifteen people from across North America. Five of the contributors are from The University of Alberta: *Ronald T. Coutts* (Pharmacy), *Abram J.D. Friesen* (Pharmacy), *John J. Peto* (Medicine), *David Skelton* (Medicine), and *Keith Walker* (Medicine). The text was released recently by the C.V. Mosby Company.
